The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following: The declaration does not cover the changes set forth in the amendment which was filed on November 28, 2001.

In accordance with 37 CFR 1.175(b)(1), a supplemental reissue oath/declaration under 37 CFR 1.175(b)(1) must be received before this reissue application can be allowed.

Claims 1-35,37,38 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251. See 37 CFR 1.175. The nature of the defect is set forth above.

Receipt of an appropriate supplemental oath/declaration under 37 CFR 1.175(b)(1) will overcome this rejection under 35 U.S.C. 251. An example of acceptable language to be used in the supplemental oath/declaration is as follows:

“Every error in the patent which was corrected in the present reissue application, and is not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicant.”

See MPEP § 1414.01.

Claims 10-27 are rejected under 35 U.S.C. 251 as being broadened in a reissue application filed outside the two year statutory period. Note that the abandonment of the parent application, SN 09/239054 served to eliminate the filing date thereof as a priority date for the present application. A claim is broader in scope than the original claims if it contains within its scope any conceivable product or process which would not have infringed the original patent. A claim is broadened

if it is broader in any one respect even though it may be narrower in other respects.

Examples of the broadening nature of the claims include the failure to recite the air-flow channel extending through the support member and the recitation of the porous member in the independent claims.

Claims 10-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 10, line 10, "the top surface" lacks definite antecedent basis.
